

Philipp Triet

Chief Technology Officer (CTO)

Philipp Triet took over the role of Chief Technology Officer (CTO) at ELPRO in December 2024. He brings extensive experience from his work with interdisciplinary development and innovation teams as well as managing international technology projects. As CTO, he leads the further development of ELPRO's solution portfolio and the associated business models.

Philipp Triet has worked for various Swiss companies in the fields of electronics and mechatronics development and production as well as digital drinking water management. Most recently, he was head of product development EMEA at the Condair Group, which is also active in the medical sector. There he was a member of the global group management and was responsible for the introduction of agile project methods throughout the entire development process.

In addition to his professional activities, the qualified electronics engineer completed a degree in applied electrical engineering and a master of business administration at the FFHS in Zurich and Bern. He also studied software engineering at the HSR Rapperswil.

As CTO, Philipp Triet is part of the ELPRO executive management team.

“As CTO at ELPRO, I am delighted to help shaping the technological future of the company. Together with my team and the entire ELPRO team, we are doing everything we can to use the latest technologies in a targeted manner to create innovative, efficient solutions for our customers. Our aim is not just to move forward but also to actively drive technological change - always with a clear focus on the needs of our partners and customers.”

– Philipp Triet, Chief Technology Officer, ELPRO
